

# Make targets

## make <package>-<target>

- **source** Fetch the source (download the tarball, clone the source repository, etc)
- **depends** Build and install all dependencies required to build the package
- **extract** Put the source in the package build directory (extract the tarball, copy the source, etc)
- **patch** Apply the patches, if any
- **configure** Run the configure commands, if any
- **build** Run the compilation commands
- **install-staging** **target package:** Run the installation of the package in the staging directory, if necessary
- **install-target** **target package:** Run the installation of the package in the target directory, if necessary
- **install** **target package:** Run the 2 previous installation commands. **host package:** Run the installation of the package in the host directory
