

needs

OR-ed needs

Not possible

- [Is there a way to use OR condition with needs in GitLab CI job](#)
- [Is there a way to use OR condition with needs in GitLab CI job](#)

Workaround:

- duplicate all jobs chain (use hidden job as template and change only relevant parts)
- Do not use needs, but simple stage ordering.
- use optional (but it is not the same like OR: sideeffect: possible to start job without needed artifacts)

```
docker-login:
  extends: .docker
  needs:
    - job: docker-build-VITE
      optional: true
    - job: docker-build-WEBPACK
      optional: true
```
