

# Pages on 2nd IP

After config changes, `gitlab-pages` cannot be started:

```
# gitlab-ctl status gitlab-pages
down: gitlab-pages: ls, normally up, want up; run: log: (pid 460) 1847402s
```

Reason: Gitlab's NGINX still occupying all IP addresses:

```
# grep listen /var/opt/gitlab/nginx/conf/*
/var/opt/gitlab/nginx/conf/gitlab-http.conf:    listen *:80;
/var/opt/gitlab/nginx/conf/gitlab-http.conf:    listen *:443 ssl http2;
/var/opt/gitlab/nginx/conf/gitlab-registry.conf:  listen *:5050 ssl;
/var/opt/gitlab/nginx/conf/nginx-status.conf:     listen *:8060;
```

```
lsof -nP -i tcp:80
lsof -nP -i tcp:443
```

Solution: fix nginx['listen\_address'] = ['MYIP'] to nginx['listen\_addresses'] = ['MYIP']
