

# signing git commits

See [gpg-agent forwarding](#)

```
git config --global user.signingkey XXXXXXXXXXXXXXXX
```

Enable signing of each commit by default:

```
git config --global commit.gpgsign true
```

## signing and verifying

```
git verify commit <HASH>
```

```
gpg:                using RSA key XXXXXXXXXXXX
gpg: Good signature from "User <user@example.com>" [unknown]
gpg: WARNING: This key is not certified with a trusted signature!
gpg:                There is no indication that the signature belongs to the
owner.
Primary key fingerprint: XXXX XXXX ...
```
