

HA in VirtualBox

Download .ova file and import it in Virtualbox.

- don't change network adapter type
- Make sure that EFI is enabled in the System tab

<http://homeassistant.local:8123>

Issues

netdevice: enp0s3: failed to disable LRO!

When network adapter type is set to Paravirtualized Network (virtio-net)

Solution: Change network adapter to Intel PRO/1000 MT Desktop

connection refused on port :8123

HA is working. Console CLI is working.

```
os update
# Device will reboot after update
```
