

backupninja

Issues

Error: Warning: Access Control List file not found

When running *.rdiff backup.

```
== fatal errors from /etc/backup.d/90.ssd.rdiff ==
```

```
Info: Removing backups older than 10D days succeeded.
```

```
Error: Warning: Access Control List file not found
```

```
Warning: Extended Attributes file not found
```

```
Fatal: Failed backup up source
```

backupninja is using *rdiff-backup* utility. SOLUTION: remove destination backup and backup it again (probably rdiff-backup version mismatch)
