

Buildx issues

extremely slow loadin metadata

```
[+] Building 3.4s (2/3)
=> [internal] load build definition from Dockerfile
=> [internal] load metadata for docker.io/library/python:3.9-alpine
```

There is not IP traffic to docker.io host!

Reason: registry mirror was set in /etc/docker/daemon.json, but access to this registry was blocked on FW.
