

stderr: lchown invalid argument

Running Docker in Proxmox's LXC unprivileged container. Try to pull Shinobi image. Last layers cannot be applied and error is shown:

```
stdout: stderr: lchown /home/Shinobi/node_modules/buffer-equal-constant-time/.npmignore: invalid argument"
```

Workaround:

- [Docker pull error: failed to register layer: ApplyLayer exit status 1 stdout: stderr: lchown ...: invalid argument](#)

References:

- [Rootless pull fails with - failed to register layer: ApplyLayer exit status 1 stdout: stderr: lchown <file>: invalid argument #43576](#)
