

bracketed paste mode

Keywords: garbage/extral tilde characters when copy-paste in terminator.

Sometimes pasting into terminal adds weird characters with tilde. E.g.:

```
0~pasted text1~
```

This feature is called “bracketed paste mode”. It used to distinguish typed text from pasted text. It should be correctly handled by modern terminal however “xfce4-terminal” is not handling it.

To disable mode in terminal

```
printf "\e[?2004l"
```

To permanently disable mode, please add

```
~/.bashrc
```

```
bind 'set-enable-bracketed-paste off'
```

xfce4-terminal

Xfce4-terminal is using old libvte9 package (pool/main/v/vte/libvte9_0.28.2-5+b1_amd64.deb)

To fix it <https://sourceforge.net/p/pacmanager/bugs/243/>
