

Network Manager

Disable resolv.conf update

To prevent NM from destroying content of resolv.conf:

[/etc/NetworkManager/NetworkManager.conf](#)

```
[main]
...
dns=none
...
```

```
nmcli con reload
```

Excluding interfaces

Do not touch any interfaces defined in **/etc/network/interfaces**

[/etc/NetworkManager/NetworkManager.conf](#)

```
[main]
plugins=ifupdown,keyfile

[ifupdown]
managed=false
```

Specify interfaces to ignore:

[/etc/NetworkManager/NetworkManager.conf](#)

```
[main]
plugins=keyfile

[keyfile]
unmanaged-devices=interface-name:wlan0mon
unmanaged-devices=mac:xx:xx:xx:xx:xx:xx
```

```
nmcli con reload
```
