

OpenProject

Debian packages

[stable 8 branch](#)

Debian installation guide:

<https://www.openproject.org/open-source/download/packaged-installation-guide/>

commands

Executing rake command where openproject was installed from .deb package

```
openproject run console
openproject run ruby -v
openproject run env
openproject run rake backup:database:create

openproject run rake tmp:cache:clear

openproject config      # show current config
openproject reconfigure # after change config
openproject configure   # after upgrade to newer version

openproject logs --tail

openproject run rake --tasks
openproject run rake db:migrate:status
openproject run rake assets:precompile
```

Activate Background Jobs

Start background worker once.

```
openproject run rake jobs:workoff
```

Add it to cron

```
su - openproject -c "bash -l"
[openproject@all] crontab -e
```

```
*/1 * * * * /usr/bin/openproject run rake jobs:workoff
```

```
openproject run bin/delayed_job start
```

Backup

<https://www.openproject.org/open-source/upgrade-backup/packaged-installation-backup-guide/>

```
openproject run backup
```

| [op_delete_old_backups.sh](#)

```
#!/bin/bash -eu
DIR="/var/db/openproject/backup"
find $DIR -mtime +4 -exec rm {} \;
```

CSS

Edit files: /app/assets/stylesheets/_jstoolbar.sass

```
textarea, iframe
  margin: 0
+ font-family: monospace
```

And regenerate static assests:

```
openproject run rake assets:clean
openproject run rake assets:clean:all
openproject run rake assets:precompile
```

Issues

clear memcached

```
telnet localhost 11211
flush_all
quit
```

undefined local variable or method `timeline_labels'

Your query is erroneous and could not be processed.

An internal error has occurred.

```
Original error: #<NameError: undefined local variable or method
`timeline_labels' for #<Query:0x00007ff7b3bd5a80>
Did you mean?  timeline_visible>
```

Stacktrace:

```
/opt/openproject/vendor/bundle/ruby/2.4.0/gems/activemodel-5.0.4/lib/active_
model/attribute_methods.rb:433:in `method_missing'
/opt/openproject/app/models/query/timelines.rb:41:in
`valid_timeline_labels'
/opt/openproject/vendor/bundle/ruby/2.4.0/gems/activesupport-5.0.4/lib/activ
e_support/callbacks.rb:382:in `block in make_lambda'
/opt/openproject/vendor/bundle/ruby/2.4.0/gems/activesupport-5.0.4/lib/activ
e_support/callbacks.rb:169:in `block (2 levels) in halting'
/opt/openproject/vendor/bundle/ruby/2.4.0/gems/activesupport-5.0.4/lib/activ
e_support/callbacks.rb:547:in `block (2 levels) in default_terminator'
```

Some migrations are missing (error during upgrade???):

```
openproject run rake db:migrate:status
...
up      20170602073043 Save zoom level in query
up      20170614131555 Add favicon touch icon to custom style
down    20170703075208 Add attribute help texts
down    20170705134348 Remove attribute visibility
down    20170818063404 Add timeline labels to query
```

Try to run migrations on current db:

```
openproject run rake db:migrate
```

```
== 20170703075208 AddAttributeHelpTexts: migrating
=====
-- create_table(:attribute_help_texts)
-> 0.0183s
== 20170703075208 AddAttributeHelpTexts: migrated (0.0185s)
=====

== 20170705134348 RemoveAttributeVisibility: migrating
=====
-- remove_column(:types, :attribute_visibility, :text)
-> 0.0310s
== 20170705134348 RemoveAttributeVisibility: migrated (0.0312s)
```

```
=====
== 20170818063404 AddTimelineLabelsToQuery: migrating
=====
-- add_column(:queries, :timeline_labels, :text)
   -> 0.0372s
== 20170818063404 AddTimelineLabelsToQuery: migrated (0.0374s)
=====
```
