

match case

```
match expression_to_match:
    case pattern1:
        # Code block for pattern1
    case pattern2:
        # Code block for pattern2
    ...
    case patternN:
        # Code block for patternN
    case _:
        # Catch-all, default code block (optional)
```
