## Web admin

<https://docs.ejabberd.im/admin/guide/managing/#web-admin>

You need to use full “user@domain.org” to authenticate. Make sure that admin acl is set for “user” not for “user@domain”, to work for all virtualhosts.

## Find passwords

```
ejabberctl dump config
```

Look for file config and find lines:

```
{passwd, {<<"user1">>, <<"hostname.com">>} , <<"secret1">>}.  
{passwd, {<<"user2">>, <<"hostname.com">>} , <<"secret1">>}.
```
