

Issues

Sabre\DAV\Exception\BadRequest

```
Sabre\DAV\Exception\BadRequest: Expected filesize of 1153433600 bytes but read (from Nextcloud client) and wrote (to Nextcloud storage) 0 bytes. Could either be a network problem on the sending side or a problem writing to the storage on the server side.
```

Reason: Nextcloud docker v 24.0.3-apache is based on docker php:8.0-apache-bullseye.

In the meantime Apache change default LimitRequestBody value from unlimited to 1GB:

[LimitRequestBody Directive](#)

compatibility: In Apache HTTP Server 2.4.53 and earlier, the default value was 0 (unlimited)

[Apache images built after ~mid June 2022 introduce 1GB upload limit #1796](#)

Too many requests

Too many requests

There were too many requests from your network. Retry later or contact your administrator if this is an error.

NextCloud v20 in Docker. Nginx rev proxy.

```
./occ.sh security:bruteforce:reset 127.0.0.1
```

Install app: Brute-force IP whitelist Add whitelist IPs under security settings -> Brute-Force IP-Whitelist
