

Creating snap: 0% complete...failed

Trying to create VM snapshot with name up:

```
pve6 pvedaemon[2014989]: rbd snapshot 'vm-153-disk-1' error: Creating snap:
0% complete...failed.
pve6 pvedaemon[3638911]: <root@pam> end task
UPID:pve6:001EBF0D:69C603F8:65B0A789:qmsnapshot:153:root@pam: rbd snapshot
'vm-153-disk-1' error: Creating snap: 0% complete...failed.
```

```
rbd ls -l
```

vm-153-disk-1@up	8 GiB	2
vm-153-disk-1@up5	8 GiB	2

```
rbd du
```

vm-153-disk-1@up	8 GiB	5.4 GiB
vm-153-disk-1@up5	8 GiB	2.6 GiB
vm-153-disk-1	9 GiB	1008 MiB

Shows that snapshot exists, but it is not visible under Proxmox!

```
rbd snap rm rbd/vm-153-disk-1@up
```
