

Sync last N job

How to make backup to backup ?

Scenario where sync target has less disc space than “master” PBS server.

NOT IMPLEMENTED NOW see

[Bug 3701 - proxmox-backup-manager pull: allow to specify which snapshots / vms are synced](#)

Workaround 1

- requires the same amount of space for while
- sync all then prune

Workaround 2

- <https://forum.proxmox.com/threads/proxmox-backup-server-remote-sync-only-latest-n-backups.118903/#post-515702>
