

0x8000FFFF

Windows Update error 0x8000FFFF

Additional symptoms:

- sfc /scannow stuck at 7% and cannot complete (also from Safe Mode)
- mmc.exe - app locked
- Able to run mmc.exe from Power Shell run as Administrator

It looks like strange Windows files corruption.

Try to fix:

- bitsadmin.exe /reset /allusers
- chkdsk /r
- ICACLS C:\Windows\winsxs
- [ADW Cleaner](#)
- [Servicing Stack Update](#)
 - systeminfo - check Windows version
 - [Latest SSU Updates](#)
 - Install [KB4586864](#)
- [Smart Fix](#)
 - It installs Windows RE and integrate it into boot menu
 - Cannot work with QEMU SCSI Virtual Controller!
- [Sfc /scannow stops on Windows 10 \[BEST SOLUTIONS\]](#)
 - [FIX: DISM failed on Windows 10](#)
- ```
icaccls C:\windows /reset /t /c /l
```
- [SFCFix](#)

Anty malware tools:

- [Farbar Recovery Scan Tool FRST](#)

DISM:

```
Dism.exe /online /cleanup-image /scanhealth
Error: 4448
Sterownik WOF napotkał uszkodzenie w tabeli zasobów skompresowanego pliku.
```

Found hints on Internet:

```
Dism.exe /online /cleanup-image /restorehealth

REM or
REM use WIN10 installation CD-ROM as drive F:
```

```
REM First list all images inside instalaltion CD:
dism /Get-WimInfo /WimFile:F:\sources\install.wim
REM remember index of your installation, i.e. 6 for Win 10 Pro
dism /Online /Cleanup-Image /RestoreHealth
/Source:WIM:F:\sources\install.wim:6 /LimitAccess

REM or
REM mount Windows folder from another healthy system as Y:
Dism.exe /Online /Cleanup-Image /RestoreHealth /Source:Y:\ /LimitAccess
```

doesn't help, the same error.

## Solution ?

```
Dism.exe /Online /Cleanup-Image /StartComponentCleanup
Dism.exe /Online /Cleanup-Image /AnalyzeComponentStore
sfc/scannow
Dism.exe /Online /Cleanup-Image /RestoreHealth
sfc/scannow
```
