

irfanview

```
export WINEARCH=win32
```

Download 32 bit version of [irfanview](#)

```
winetricks -q mfc42  
wine iview453_setup.exe
```

Plugins http://irfanview.info/files/irfanview_plugins_444_setup.exe

Issues

JPG file not associated

Command:

```
mimeopen -d file.jpg
```

doesn't show IrfanView to choose.

Create file `/home/user/.local/share/applications/wine-extension-jpg.desktop` and set it to handle image/jpeg Also remove env `WINEPREFIX` line when using default prefix

```
[Desktop Entry]  
Type=Application  
Name=IrfanView 32-bit  
MimeType=image/jpeg;  
Exec=wine-stable start /ProgIDOpen IrfanView.jpg %f  
NoDisplay=true  
StartupNotify=true  
Icon=7BE4_i_view32.0
```

Update the mime cache: `update-desktop-database /home/user/.local/share/applications`

WINEPREFIX: not an absolute path

If default wineprefix is used, the env variable `WINEPREFIX` cannot be set to the same default prefix directory.

Linux alternative

Nomacs

In Debian Buster

```
apt-get install nomacs
```
