Issues

slow applicatio nstartup

I have irfanview associated to graphic files. With every click on graphic file, nothing happens. Disk IO activity goes to 100% level for few seconds, and then irfan view window appear. Utility iotop shows disc usage by winemenubuilder.exe. Tracing syscalls with strace -f /usr/lib/wine/wine winemenubuilder.exe shows lots of operation on fonts directory:

Solutions 1

[Wine slow to start? - try this: \[SOLVED\] Wine is really slow](#)

```
wineboot --update
```

Solution 2

https://wiki.winehq.org/FAQ#How_can_I_prevent_Wine_from_changing_the_filetype_associations_on_my_system_or_adding_unwanted_menu_entries.2Fdesktop_links.3F

In winecfg: before running the installer, run winecfg. Go to the Libraries tab and type winemenubuilder.exe into the "New overrides" box (it is not in the dropdown list). Click add, then select it from the "Existing overrides" box. Click "Edit" and select "Disable" from the list, then click "OK".

Alternative: select builtin

version mismatch

```
wine client error:0: version mismatch 1/490.
Your wineserver binary was not upgraded correctly,
or you have an older one somewhere in your PATH.
```

Or maybe the wrong wineserver is still running?

```
pkill wine  
pkill exe
```

Could not load wine-gecko. HTML rendering will be disabled

Download the current gecko, see here: <http://wiki.winehq.org/Gecko>. Then install it in your wineprefix:

```
wine msiexec /i wine_gecko-2.40-x86.msi
```
